

G* GRASS®

DWD XP DRAWER SYSTEM

The comfortable and versatile comprehensive drawer range.

DWD XP.

Intelligent in use,
well-conceived for
processing.

It's the combination that matters. The exceptional running characteristics of the fully synchronised slide and the timeless drawer side design complement each other to create a comprehensive and versatile range of drawers.

DWD XP provides all the ingredients for individual style and comfort in the modern kitchen. The intelligent and comprehensive drawer range encompasses a large number of drawer options, two inset panels and a choice of three colour finishes to meet a wide range of customer wishes. Its well thought out handling details make DWD XP a proven partner in kitchen manufacture.

DWD XP TOP.

The crystal clear solution
for timeless aesthetics.

**Generous use of materials for
greater scope in design.**

The TOP add-on from GRASS allows transparent insights. A choice of materials such as glass, acrylic glass or wood can be used to create large surfaces and slick accents. Simply the most attractive solution for an add-on.

DWD XP railing systems.

Two versions for more storage space.

Whether round or rectangular is simply a matter of taste. But we make no compromises where effortless fitting of either railing version is concerned.

The round and rectangular railings provide a simple means of extending the DWD XP drawer sides for perfect utilisation of the available storage space. Each of the two railing systems gives pot drawers optimal stability and, if required, offers additional security for the items stored through the use of cross dividers.

DWD XP DUOWING.

The compact container solution for storage items.

More storage space required? – No problem.
With clever add-on systems, drawer sides gain extra height in a flick of the wrist.

DWD XP Duowing provides high, closed side walls with ease. The elements simply clip over the round railing onto the drawer side and that's it. This creates steel drawer sides that are compact and closed off from the outside, providing solid protection for the items stored.

DWD XP VARIOWING. More storage volume and styling.

Personal taste is everything. That's why we provide the practical add-on option, which instantly transforms a round railing solution into a stylish side wall.

The choice of a pot drawer with round railing opens up additional design options. Whether it's glass, acrylic glass or aluminium, the required side elements are simply integrated into the Variowing clips on the round railing. Security for the drawer contents and appealing to the eye.

ALUMINIUM
METALLIC

WHITE

CHAMPAGNE

Extended colour range. Some like champagne.

Alongside the two DWD XP classics, white and aluminium metallic, the compact drawer system offers the colour option champagne as an alternative.

Variability is one of the hallmarks of the comprehensive drawer range. And that includes the choice of colours. The powder-coated drawer sides are not only available in the popular colour options white and aluminium metallic, but also come in an elegant, matt champagne finish to provide a stunning accent in kitchen furniture.

Organise, divide, configure:
Modular dividing systems ensure
a clear arrangement.

Our individual dividing systems are designed to organise the contents of regular and pot drawers and make life easier for the kitchen user.

When used in combination with the DWD XP add-on systems, the closed, flexible Magic Optima elements ensure that everything stays in its proper place inside the drawer. For drawer contents, Tavinea Sorto offers the ideal solution for systematic organisation.

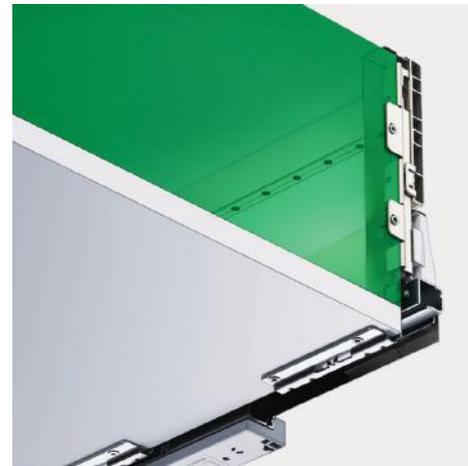

DWD XP DRAWER SYSTEM

Strong details.
Sound workmanship
and simple installation.

Our product solutions prove their qualities in practice and cannot fail to impress with optimal ordering and processing comfort.

Solid, stable and strong – the front holder in zinc diecasting delivers what it promises. In addition, the bottom and back panels are the same width, which saves valuable time when cutting. Bottom and back panels are securely fixed to form a clean connection using the practical back panel clips.

GRASS comfort systems. Dependable movement.

Our practical opening and closing systems have simply become indispensable. They make daily life so much easier, particularly when people have their hands full.

Soft-close

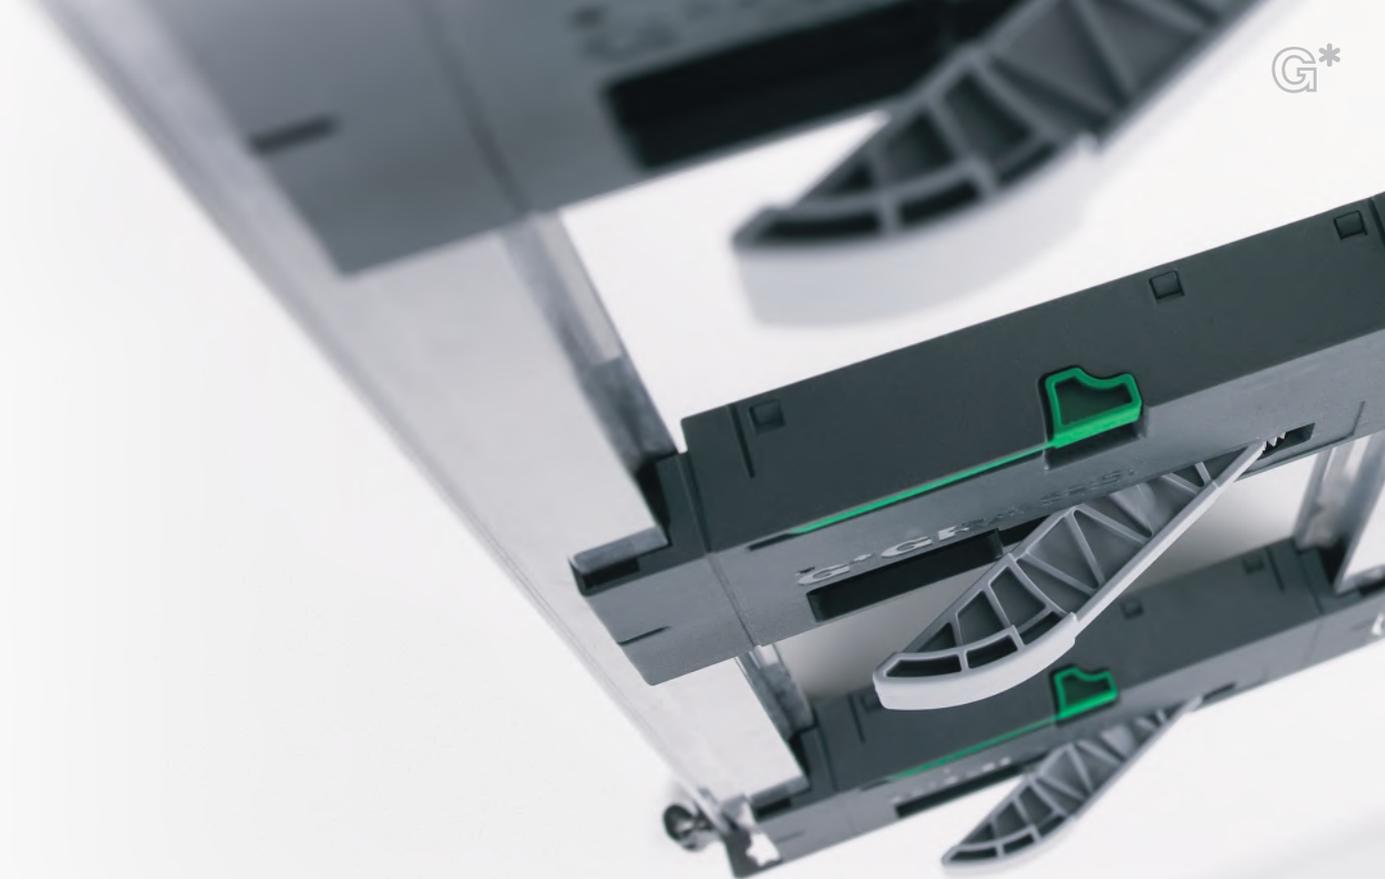

The mechanical damping system gently brakes the movement of the drawer as it closes and pulls it shut virtually without a sound. One of our popular standards, which many users no longer want to do without.

Sensomatic

The electro-mechanical opening system brings together the benefits of handle-free opening and gentle closing in combination with the Soft-close technology.

Tipmatic Plus

With the mechanical opening system, a gentle nudge is all that's needed to open regular and pot drawers. The ideal solution for elegant handle-free furniture.

Flat pack set. Simply order and store.

Simple and clear with no complications: one order number gives you everything that defines a drawer system in a practical set.

We don't just concentrate on essentials in design, but also make life easier for our customers when it comes to planning and ordering. With DWD XP, we offer you the option of ordering your drawer system as a complete item with a single order number.

The practical set solution is packaged and delivered as a flat pack set. All the GRASS components are clearly sorted and immediately at hand in one pack. Added bonus: the low packaging volume means that DWD XP enables space-saving storage and can be reordered using a single order number.

Slick.

Functionality
in every detail.

Attractive benefits at a glance:

- **Harmonious running characteristics:** fully synchronised drawer technology with no mid-way knock.
- **Silent closure:** drawer braking by means of the integrated Soft-close technology with liquid damper.
- **High load capacities:** 40 kg and 60 kg with minimal deflection.
- **Sturdy front fixing:** in solid zamak alloy.
- **Wide choice:** 4 add-on options; 2 inset panels; 3 colours, white, aluminium metallic and champagne.
- **Safe handling:** with the practical safety device for secure transport.
- **Effortless processing:** practical push-fit system with different back panel clips; no veneers required for cut edges.
- **Simple assembly:** the same width for bottom and back panels simplifies processing and saves time when cutting.

DWD XP

The versatile comprehensive drawer solution
with functionally impressive comfort.
