QUATURIS L CORNER CABINET SYSTEM

The economical movement solution
for standard base cabinets.
Ergonomic. Efficient. Functional.

Quaturis L: A highly efficient movement system for corner cabinets.

Making optimum use of storage space is one of the greatest challenges in modern furniture design. And what nobody even suspected: corner areas hold the greatest potential. With Quaturis L, GRASS offers an economical movement solution for standard base corner cabinets.

For users who are not prepared to compromise where storage space is concerned.

The whole is the sum of the parts.

Every last detail, whether visible or hidden, fulfils a particular purpose. All the way through from the guide disc that gently cushions every movement, to the robust suspension system that easily supports high loads. But it doesn't stop there. The swivel mechanism ensures optimal access to the entire storage area. The fact that the lower level shelf moves automatically when the door opens is a particularly practical option.

An effective combination of form and function lies at the heart of Quaturis L.

Open. Swivel. Access.
Storage couldn't
be any easier.

The features of the Quaturis L corner cabinet system at a glance:

- **Functional:** For standard corner cabinets in widths 900 mm, 1000 mm and 1200 mm. Installation possible with an inside depth of 490 mm and above.
- **Convenient:** Shelves swing almost completely out of the corner cabinet. All levels can be moved independently of each other.
- **Easy to use:** The swung-out shelves offer optimum access to the whole storage surface.
- **Comfort closure:** When the door is closed, the shelves automatically retract into the cabinet. Optionally with Soft-close damping.
- **Loadable:** Each shelf easily supports 20 kg and is steplessly adjustable in height.
- **Flexible:** Quaturis L can be used for either right-hand or left-hand corner cabinets.
- **Practical:** Simple screw fitting to bottom panel and stretcher – no additional side fixing required.
