

GRASS DRAWER SYSTEM

# NOVA PRO SCALA

Inspiration in the right angle.  
Simple. Clear. Timeless.

## NOVA PRO SCALA DRAWER SYSTEM

**Nova Pro Scala –**  
Synonymous with versatility,  
neutral aesthetics, inspiration  
and creativity.

**Nova Pro Scala is design reduced to the essence – to clear design principles on the one hand and to the perfect unity of form and function on the other.**

The puristic design language with its striking lines, right angles and small radii gives the double-wall metal drawer sides a timeless, technical and functional look. The special character of Nova Pro is hallmarked by its perfection down to the last detail and the modular system concept. Everything is focused on perfect function, top quality and lasting value – from the precision craftsmanship of every individual part as well as the colour and surface finishes.

»Nova Pro is a piece of contemporary history.  
Nova Pro Scala a step into the future.«

There can only be one.  
Nova Pro, the original.

**Over the years, Nova Pro has become synonymous with double-wall slides.**

Proven millions of times over in practical use, this drawer side remains unparalleled in terms of quality, stability and smooth running. Nova Pro epitomises exceptional ease of opening, outstanding running properties, minimal drawer deflection and top reliability. Nova Pro brings furniture to life. Around the world. That's why the very name of Nova Pro creates expectations that we have to satisfy with each and every product.

**186 millimetres.**  
That means an entirely  
new dimension in  
drawer sides.

**The conventional wooden drawer is basically  
a four-sided box with a front panel.**

Strictly speaking, we are adopting a back-to-basics  
approach in offering a 186 mm drawer side for a  
box-style drawer with Nova Pro Scala alongside the  
63 mm, 90 mm and 122 mm versions. The new box-  
style drawer side is high, enclosed and aesthetic.  
Sounds good. And it is.

186

**Rectangular railing.**  
High level of stability and  
consistent design.

**The drawer with railing has long been an absolute classic solution for adding height.**

At the bottom a 90 mm drawer side, at the top a railing. Job done. What sounds perfectly simple at first glance is actually a sophisticated technical challenge. Because for Nova Pro Scala we've not only developed a new rectangular railing but also technically optimised all components throughout and restyled them to create a harmonised design concept. From the front fastening to the back panel connection and the integrated tilt angle adjustment - everything is flush-fitting and matches perfectly to provide a harmonious, elegant impression.

## Nova Pro Scala Crystal. Consistent through to the last detail.

**Crystal is many things in one: a stabilising side wall, a means of individualisation and a stylish design element.**

For Nova Pro Scala we've subjected the Crystal add-on system to a fundamental redesign. From now on, all parts – drawer side, attachment posts and any inset drawer fronts – are exactly matched in colour and material. In addition, the rear attachment post has been significantly reduced in size and adapted to suit the thickness of the back panel so that, for the observer, the attachment element appears to be directly connected to the back panel. This and many other details give Crystal a particularly light and open look.

**Crystal Plus.**  
More glass. More creative  
scope. More stability.

Modern architecture is bright, flooded with light and open. Windows have made way for large glazed surfaces. Even the walls inside buildings are increasingly designed as transparent partitions. One might well think that the zeitgeist is transparent. Transparency has long been a mega-trend. Furniture is also becoming more transparent. Whether it incorporates backlit glass fronts, glass shelves or dispenses with fronts altogether, modern furniture shows what's inside.

**Entirely in keeping with this new openness,  
Nova Pro Scala offers a unique product solution:  
the frame-sided drawer Crystal Plus.**

## **Inset drawer front panel. For a good impression behind the front.**

The percentage of high fronts concealing inset drawers is rapidly increasing. Because high fronts can be used to make modern furniture even more puristic. Every gap or reveal that can be dispensed with makes for a more homogeneous design. Nova Pro Scala offers a truly appealing solution for these particular applications: elegant and slender inset drawer fronts which are perfectly coordinated with the form and colour of the new drawer system.

**With a thickness of only 8 mm, the aluminium front panels not only look good, they also add aesthetic appeal to Nova Pro Scala drawers when they are closed.**

## Timeless variety. Nova Pro Scala Colours.

**Metallic colours, fine structures and satin finishes – these are the features of modern design.**

The new colour SILVER makes it possible to carry this design principle through to the furniture interior. This elegant shade has an intuitively harmonious and modern effect.

The natural purity of ice and snow, the unique reflection of light and the fine surface texture – all these things inspired us to create the colour ICE. This elegant shade neutralises, brightens and enlivens.

Stone as the symbol of eternity, the expression of timelessness, a natural force which seems to resist all external influences, was the inspiration for the very popular shade of the same name.

## NOVA PRO SCALA DRAWER SYSTEM

**Differentiation.**

Nova Pro Scala enables the creation of styles, functions and values which make all the difference.

**Anyone who wants to be successful has to be able to set themselves apart. This simple rule applies equally to all products.**

To the kitchen, living room and bathroom furniture of our customers as well as to the GRASS movement systems. This made it all the more important for us to develop Nova Pro Scala as a drawer system which provides our customers with a fantastic means of differentiating their products.

The new drawer system can also be combined with the existing Classic and Deluxe systems, which opens up a wide and unique range of options for ensuring that the furniture interior makes a distinctive impression.

**Individualisation.**  
Looking for ways to stand  
out from the crowd?

**Yesterday metal, today wood, tomorrow minerals.**  
Individual designer panels make Nova Pro Scala  
the most variable drawer system ever.

Wouldn't it be innovative to change the aesthetic perception of a drawer when it is fitted? The rectangular form of the Nova Pro Scala drawer side makes this possible – design strips in the form of L profiles can not only be attached magnetically or with adhesive, but snugly mould to the drawer sides.

**Material freedom.**  
Glass – you either love it  
or hate it.

**Glass divides the furniture world. This is reason enough to develop two systems that can support both sides – the Crystal and Crystal Plus add-on systems.**

The absolute minimum for the technical elements at the bottom, a strong holder at the front and back - let the fun begin! Individual taste then decides whether glass or another material is used as a design element. The special advantage of the new Crystal Plus frame drawer is the newly developed clip technology. It ensures safe and strong bracing of large design elements without having to prepare them in any way.

NOVA PRO SCALA DRAWER SYSTEM

## Tavinea 91. Interior accessory system.

**Two that are actually one. Nova Pro Scala and Tavinea 91 are almost symbiotically matched.**

Tavinea 91 is a clever interior accessory system for organising drawers and pull-outs that has been lovingly designed down to the last detail and that can be divided in three directions – horizontally, vertically and diagonally. The structural elements made of aluminium can be selected to match the Nova Pro Scala drawer side colour. The slide elements are available in solid natural or black ash. Tavinea 91 is therefore not only practical, but a design option for contemporary furniture.

## NOVA PRO SCALA DRAWER SYSTEM

Nova Pro Scala incorporates  
the best of Nova Pro.  
**And much more besides!**

**The outstanding features of the Nova Pro Scala  
drawer system at a glance:**

- **Timeless design:** Nova Pro Scala has an elegant, slim edge without interruption of the design outline.
- **Wide range of options:** Two Crystal and one railing version in the colours Silver, Ice and Stone in the heights 63 mm, 90 mm and 122 mm as well as a high, closed drawer with a height of 186 mm.
- **Modular:** Nova Pro Scala includes a wide range of products for segmentation of starter versions through to the premium segment. Scala is also based on the track-proven Nova Pro slide and is therefore compatible with Nova Pro Classic and Deluxe. This variety offers every option for differentiation.
- **Perfect movement:** With the track-proven Nova Pro slide for excellent running characteristics with load ratings of up to 70 kg.
- **Closing comfort:** Smooth closing action with the new Soft-close technology and very low opening forces.
- **Simple installation:** With the clever, detailed design, installation is extremely easy and saves valuable time.

## NOVA PRO SCALA

The next generation of the comprehensive drawer solution now already sets new standards in all living areas.
