

Delivering solutions to Queensland, Northern NSW and the Pacific Islands for many years, our QLD team can provide the technical expertise and experience you need to help guide you through the complexity of finding the right Acoustic Operable Wall or Acoustic Slider to suit your project needs.

There are many important factors to consider when choosing the right operable wall, such as: acoustics, size, stacking configuration, panel finishes, use of space and its environment.

Whether your next project is a hotel, conference centre, school or a commercial office, our team at Hufcor QLD can help..
